University

University of
Kent

“At Kent and Medway Medical School, we expect academic ability, but equally we are looking for the right personal qualities that people require in a good doctor.”

Professor Chris Holland
Founding Dean of Kent and Medway Medical School

Welcome

I am tremendously excited to welcome you to the Kent and Medway Medical School (KMMS). If you dream of making a real difference in people's lives through medicine, we want to hear from you.

Our vision is simple: we are building a medical school where future doctors learn to put patients first, embrace new ideas, and work together to solve healthcare challenges. Whether your passion lies in developing new treatments, working directly with patients, or advocating for improved healthcare access, KMMS offers you a path to achieve your goals.

Located in Canterbury, we combine the best of both worlds, Canterbury Christ Church University and the University of Kent, to create something special. Our programme combines hands-on clinical experience with cutting-edge research opportunities. We're particularly proud that our students come from all walks of life, bringing diverse perspectives that make our medical community stronger.

Imagine the incredible possibilities ahead: together, we will work toward breakthrough treatments for diseases that currently seem unstoppable. We will help people live longer, healthier lives, even when confronting complex health challenges. By choosing KMMS, you are not only embarking on a medical career but also joining a community dedicated to shaping the future of healthcare.

Your background, experiences, and unique perspective matter to us. If you share our commitment to compassionate and innovative healthcare, we encourage you to apply. We are here to support you every step of the way.

As a medical school accredited by the General Medical Council (GMC), we're excited to learn more about you and your aspirations in medicine.

We wish you every success in your application.

Professor Chris Holland | Founding Dean

Our vision

Kent and Medway Medical School is a beacon for first-class medical education and research, and the first choice for all those aspiring to achieve excellence in person-centred medical care in the UK.

Our values

- **Be brave**
- **Be kind**
- **Be respectful**
- **Be passionate**
- **Be collaborative**
- **Be innovative**
- **Be curious**

Why choose KMMS?

Excellent resources

You will study in state-of-the-art facilities at the campuses of both main universities. These include a high-fidelity hospital simulation suite, Kent's first GP simulation suite, an anatomy learning centre for dissection, prosection and radiology, lecture theatres, seminar rooms and flexible work spaces. You will also benefit from access to both universities' libraries, IT and sports facilities.

A strong and supportive community

With just over 500 students in total, KMMS prides itself in its strong sense of community. Students regularly feedback about how much they value being part of a relatively small medical school.

An outstanding team

Our excellent team of professional service and academic staff bring a wealth of international, national and local expertise to KMMS. Many of our inspirational academics and clinical researchers, also practise in clinical settings locally, ensuring that they continually learn about the challenges, priorities and goals of our students, patients, colleagues and other care providers.

Fully Accredited April 2025

Kent and Medway Medical School (KMMS), a collaboration between Canterbury Christ Church University and the University of Kent, is proud to announce it has received full accreditation from the General Medical Council (GMC).

A welcoming NHS community across Kent and Medway

We have built exciting new relationships with partners across the NHS in Kent and Medway. We are partnered with nearly 100 GP surgeries, community and providers including Urgent Treatment Centres and hospices, the regional mental health trust and the 4 local acute care hospital trusts. You will experience a diverse range of healthcare priorities and solutions. These connections have allowed us to build a programme of high-quality placements across our region from your first term until you graduate at Canterbury Cathedral.

Our degree programme

Our Bachelor of Medicine, Bachelor of Surgery (BM BS) is jointly awarded by Canterbury Christ Church University and the University of Kent*.

*Please note the University of Kent is merging with the University of Greenwich (Greenwich) to create a new, combined university, the London and South East University Group (LASEUG)** from 1 August 2026. The new combined university will bring Kent and Greenwich under one legal entity whilst enabling each university to retain its name, identity and local presence through separate academic divisions. This will not impact the student experience, and KMMS will continue to deliver the course, teaching and assessment in the same way bar continuous improvements.

We are working very closely with the General Medical Council (GMC) to continue KMMS's accreditation seamlessly under the new university partnership (LASEUG and CCCU) after the merger.

**Name subject to completion of consultation

What our course offers you

- **A systems-based curriculum**
- **An innovative and integrated programme**
- **Early patient contact** – you will begin clinical placements within the first term of your course

Learning will be delivered through lectures, small group learning, dissection and prosection, tutorials, simulation, including team based learning, e-modules, placements and through self-directed learning.

Assessment

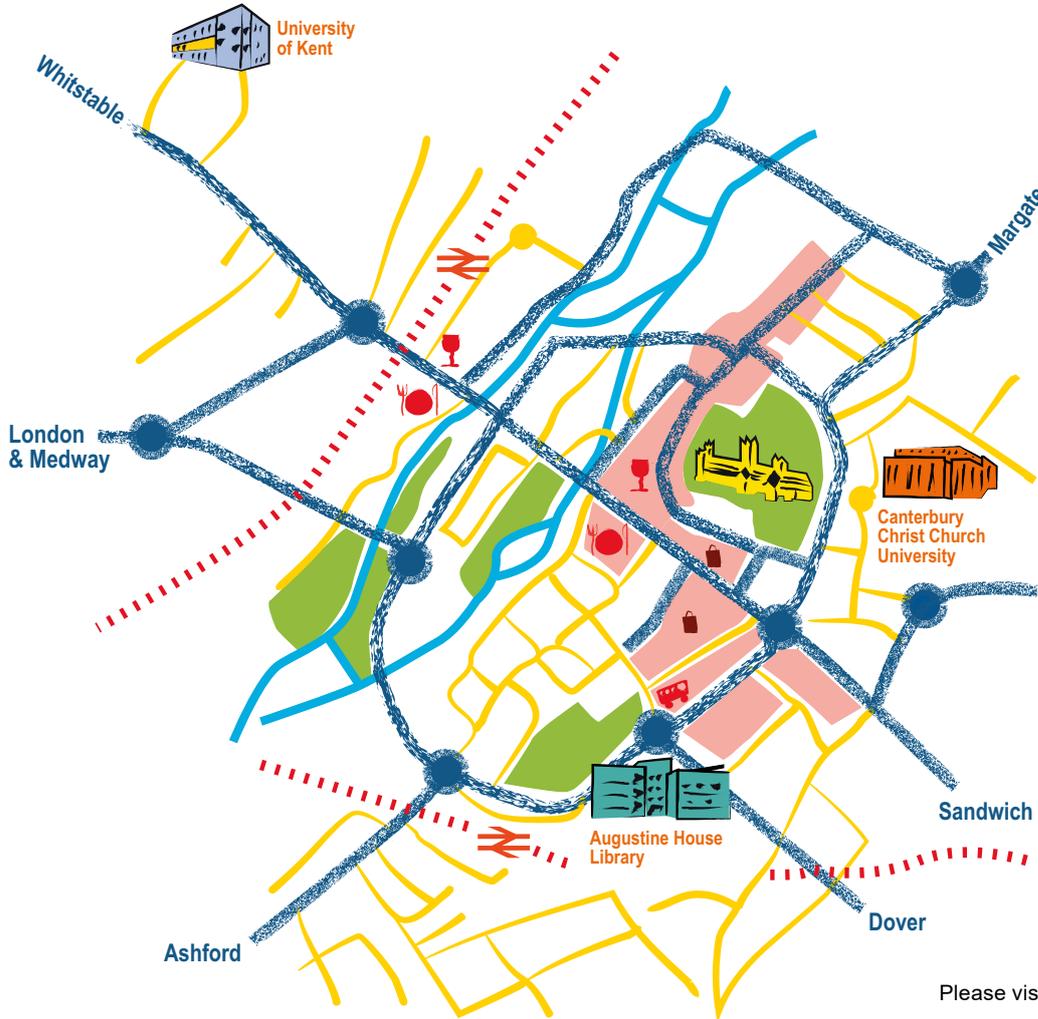

You will be given feedback and assessed throughout the course. We will use a combination of written and practical assessment methods to test your knowledge, communication and clinical skills.

Your professional development will be primarily captured with the ePortfolio. Regular meetings with your Personal and Clinical Academic Tutors and supervisors will ensure you are given the right support to keep you on track with the course and your future growth as a doctor.

Course structure

Year 1	Community and Primary Care in Practice 1 (20 credits L4)		
	Professional Development Person-Centred Practice 1 (20 credits L4)		
	Skills for Clinical Practice 1 (20 credits L5)		
	Foundations of Health and Disease (20 credits L4)	Heart, Lungs, and Blood (20 credits L5)	Nutrition, Metabolism and Excretion (20 credits L5)
Year 2	Community and Primary Care in Practice 2 (20 credits L5)		
	Professional development Person-Centred Practice 2 (20 credits L5)		
	Skills for Clinical Practice 2 (20 credits L5)		
	Neuroscience and Behaviour (20 credits L5)	Reproduction and Endocrinology (20 credits L5)	Musculoskeletal and Immune Systems (20 credits L5)
Year 3	Fundamentals of Secondary Care (80 credits L6)		Integrated Practice 1 (30 credits L6)
	Principles of Clinical Research and Scholarship (10 credits L6)		
INTERCALATION			
Year 4	Specialist Rotations (80 credits L6)		Integrated Practice 2 (40 credits L6)
	General Practice and Public Health Medicine (30 credits L6)		
	Individual Research Project (30 credits L6)		
INTERCALATION			
Year 5	Senior Rotations (80 credits L7)		Finals (100 credits L7)

Living and studying in Kent

Both universities' main campuses are close to the city centre, making it an ideal place to study and live. Just a short distance from the sea and only an hour's train journey from London, there's plenty to explore and enjoy in Kent and Medway and beyond. Mainland Europe is also within easy reach by ferry or train.

In the first two years you will study primarily at both Canterbury campuses (about 15 minutes apart by bus and 45 minutes on foot), sharing facilities with students in other healthcare professions and from a wide range of academic disciplines. You will also have primary care placements in other locations within Kent and Medway.

Years 3-5 will provide the opportunity to experience living and studying for the majority of the year in a part of the region associated with the NHS Trust of your placement. Here your confidence, clinical and communication skills will be further developed as you rotate through a programme of medical, surgical and other specialities to complete the GMC requirements for medical student training.

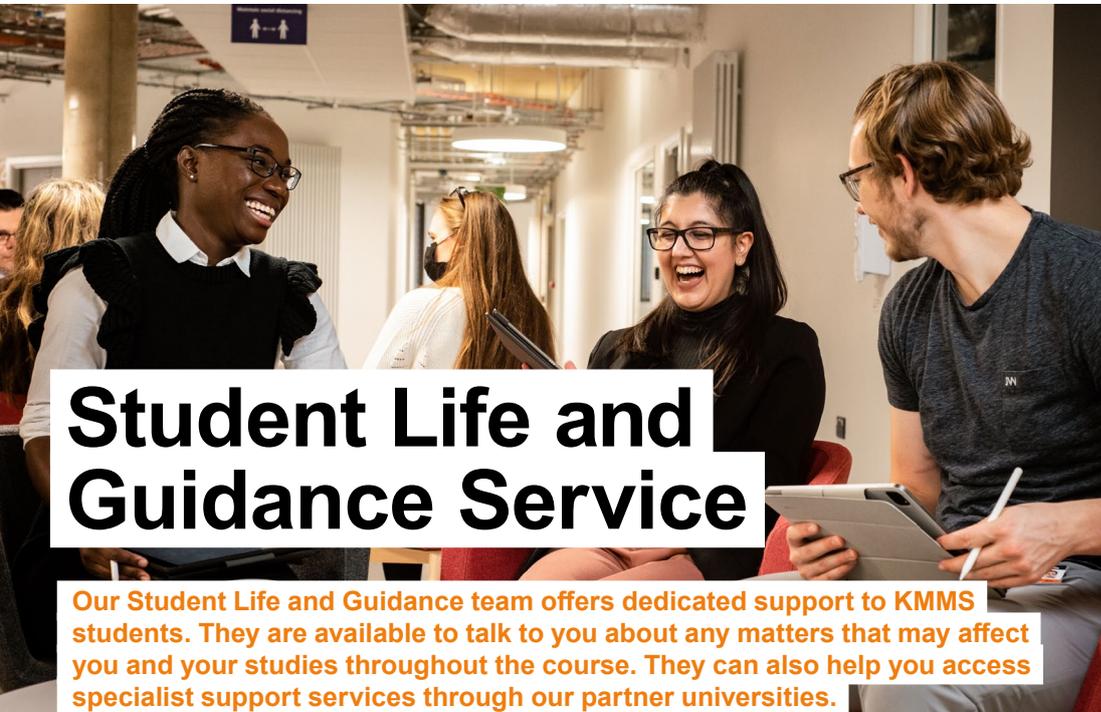

Please visit our website for more details: www.kmms.ac.uk

The best of both worlds

The medical school is a collaboration between two universities, so as a KMMS medical student you will be a student of both the University of Kent and Canterbury Christ Church University and can enjoy access to the benefits of both parent universities. You have access to facilities at both and can choose accommodation on either campus, where you will usually be co-located with other medical or healthcare students. For more information please visit: www.kmms.ac.uk/accommodation

You will also be a member of both Students' Unions and will have access to hundreds of clubs and societies. If you don't find the right one for you, you can explore setting up a new one.

Student Life and Guidance Service

Our Student Life and Guidance team offers dedicated support to KMMS students. They are available to talk to you about any matters that may affect you and your studies throughout the course. They can also help you access specialist support services through our partner universities.

To help you settle into life as a medical student, and navigate your way through your course effectively, a range of support is available including:

- An extensive welcome and induction programme.
- Thorough preparation for placements.
- A Personal Academic Tutor for the first two years and a Clinical Academic Tutor for the final three years, providing academic guidance and signposting to additional assistance.
- Counselling, Mental Health Advisers, and a schedule of activities to support your wellbeing.
- Support with disabilities, long term health conditions, autism, and Specific Learning Differences.
- IT and library services.
- Careers and employability guidance and support.

Funding your degree

At KMMS, we can signpost you to help and advice around how to pay your fees and access financial support.

To help future KMMS students, we are actively seeking donors to fund bursaries and scholarships. We already have a range of financial support packages available.

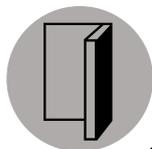

Please visit our website for more details: www.kmms.ac.uk/study/funding-your-degree

Please visit our website for more details:
www.kmms.ac.uk

Support throughout your student journey

KMMS facilitates access to a range of services and support provided by our partner universities.

01

02

KMMS offers a dedicated Student Life and Guidance team that provides in-house support to students and identifies additional specialist support available through our partner universities.

KMMS recognises that transitions may be challenging. That's why we've developed specialist packages of support and timetabled space for reflection, development and learning activities

03

04

KMMS adopts an anticipatory approach to support, providing 1:1 check-ins throughout the programme.

The KMMS Student Life and Guidance team, along with specialist support services, provide support throughout the course as needed, both on the university campus and during placements.

05

06

KMMS provides a programme of support and guidance to assist students with their preparation into practice post-graduation from the course.

Please visit our website for more details:
www.kmms.ac.uk

Please visit our website for more details: www.kmms.ac.uk

What we look for in a KMMS student

Verena Holmes Building,
Canterbury Christ Church University campus

To study at KMMS, you must possess the abilities, commitment and personal qualities that are necessary to deliver the core NHS values and become an excellent doctor.

At KMMS we want to encourage doctors from all backgrounds in Kent, Medway and beyond. We aim to widen access to medical degrees and to have a student body that reflects the diverse community we serve.

When selecting our students, we look for:

- Resilient all-rounders who can demonstrate a range of skills and attributes
- Strong academic achievement, particularly relative to their school background
- Commitment to quality of care and improvement
- An understanding of the NHS core values and the ability to put those values in action
- Compassion, and the ability to treat all people with respect and dignity
- Excellent communication skills and effective team working
- Appreciation of other people's views and willingness to accept responsibility
- A realistic and committed understanding of medical training and clinical practice

Preparing you to become a doctor

In addition to the academic side of the course, KMMS will prepare our students for life as a doctor in the NHS.

We focus on developing the communication and personal skills essential for a person-centred approach to medicine and expect our students to adopt a professional approach to their studies and life as a medical student from the outset.

When planning for your life as a medical student you will need to consider things like professional conduct and will be expected to follow our [dress code](#) in different settings throughout the course. We encourage students to factor this into their financial planning too.

In addition, the intensity of the course can make juggling studies with paid employment, family life and extracurricular activities a challenge (although many of our students successfully do so).

We monitor the attendance of our students, and this is an important measure of your professional behaviours, personal organisation and personal responsibility. We really encourage you to consider how you will manage your time effectively whilst studying with us before you apply to the course.

Please view our [Attendance and Engagement Policy](#) for details and expectations from KMMS.

Equity, Diversity and Inclusion at KMMS

We take our values and Equity, Diversity and Inclusion (EDI) very seriously at KMMS and aim to create a community where everyone feels welcome.

We have an EDI committee that meets termly to discuss issues related to inclusion and to challenge exclusion. This is led by our dedicated EDI lead, who works continually to develop EDI strategies and culture.

In Year 2 of the course, KMMS students are invited to co-create the KMMS Inclusion Conference, an annual learning event for KMMS staff and students. The 2026 conference theme is Injustice in healthcare

Justice is said to be one of the four pillars of medical ethics. But how much justice is there in medicine today? In this conference, we will try to find out by considering the potential for injustice in: (i) mental health care; (ii) the medical curriculum; (iii) the patient and doctor relationship; and (iv) evidence-based law.

MedSoc

Hey! We're the KMMS Medical Society. As Medicine is a demanding course, MedSoc ensure students have a chance to participate in a range of fun activities within the KMMS community. These include, sports events, pub quizzes, movie nights and educational seminars hosted by sub-societies within MedSoc. MedSoc also host the annual Winter, Halfway and Graduation balls.

It's not all socials, socials, socials! We also have

an active role in supporting students to voice their opinions and feedback to the medical school, through student representation at the Student Staff Engagement Forum and within the KMMS governance structure, forming part of an ongoing dialogue between students and faculty to provide the best opportunity to succeed and improve our student experience.

Interests in specialties are nurtured by the increasing number of sub-societies that host

numerous events including guest speakers from a variety of medical and non-medical backgrounds. Our commitment to being an inclusive and self-aware organisation means that we are constantly evolving alongside the medical school. If you think that we're missing something or that we can do something better, we encourage you to reach out to the committee or run in our annual elections to hold a post.

Early Clinical Placements

Early clinical placements are a key feature of the KMMS programme. For the first two years placements are primarily in primary care networks (PCNs) across Kent and Medway.

Placement learning activities offer an insight into the needs of patients in a wide range of settings and allow KMMS students to learn

about the variety of roles in healthcare and how these practitioners come together to create effective multi-disciplinary teams.

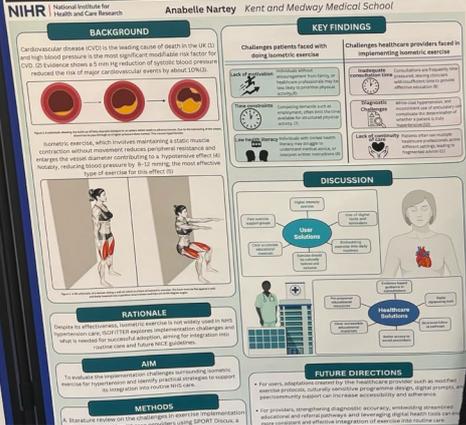

Working with experienced educators, there will be opportunities to develop the clinical skills taught on campus.

From Year 3 onwards, KMMS students will begin placements in the Acute Care and Social Care Trusts in Kent and Medway.

Research

Exercise

Exploring Barriers Faced by Users and Healthcare Providers

Research is a core activity at KMMS, supported by the ongoing growth of our research office and continued expansion and diversification of our research portfolio. We are strengthening our research across key areas of focus, including mental health, global health, and cognitive neuroscience. During the initial setup phase, KMMS-led and supported research has secured over £8 million in grant funding from major funders such as NIHR, Medical Research Council, Clinical Research Network, Wellcome, and Engineering and Physical Sciences Research Council.

Our researchers are leading and collaborating on exciting large-scale and interdisciplinary studies

across a wide range of fields, including dementia, cognition, sleep, and health inequalities, encompassing ethnic minorities, coastal and rural communities, and expanding our research reach into innovation and technology through artificial intelligence and virtual reality studies.

KMMS offer medical students valuable opportunities to engage in research through our expanding network of academic and clinical partners. Students can undertake independent projects, intercalated master's programmes including the KMMS MSc, in **Clinical Education**, electives, and National Institute for Health and Care Research (NIHR) funded summer internships, exploring topics

from vascular surgery to artificial intelligence. These experiences enrich the student journey and allow a deeper understanding of medicine, healthcare delivery, and innovation in diverse communities, both locally and globally. Many KMMS students have already presented their research at international conferences.

Our competitive academic clinical fellow programme, developed in collaboration with local NHS Trusts, supports research across specialisms including renal medicine, intensive care, and psychiatry.

Please visit our Research webpages for more information: www.kmms.ac.uk/research

Entry requirements

Qualification	Required	Required subjects
GCSE or equivalent	A* to B or 9 to 6	5 subjects minimum which must include English Language and Mathematics. We also require Biology, Chemistry and Physics. Double Science will be accepted as an alternative to the three separate sciences
A level or equivalent	AAB/AAA ¹	1st A level group ² : Chemistry, Biology 2nd A level group: Chemistry, Biology, Mathematics, Psychology, Physics, Computing/Computer Science 3rd A level group: Any other A level except General Studies, Critical Thinking
International Baccalaureate	36/34 ¹ points	Must include Biology or Chemistry at Higher Level 6 and one further Higher Level subject in Biology, Chemistry, Maths, Physics or Psychology at grade 6
Bachelors degree	2:1 Honours or equivalent	Acceptable degree subjects are listed on our website

KMMS does not use predicted grades at all. Therefore, for selection for interview, you will be considered on your most advanced achieved qualifications: GCSE if you are pre-A level, A levels if you are post-A level but have not yet graduated from a Bachelor's degree course. Offers for A-level and IB students will be contextualised to your school performance.

Additional information

- BTEC/IBCP/T levels not accepted
- Applicants who have studied an Access to HE (Medicine) programme will be considered for entry unless they are within three years of sitting A Levels
- KMMS does not accept deferred entry applicants or transfers from other medical schools
- All applicants must be 18 years old or above when they undertake their first clinical placement in the first term of Year 1, usually early November
- All successful applicants will need to pass an enhanced Disclosure and Barring Service and Occupational Health Check, which will be arranged and paid for by KMMS

¹ For further details, please visit: www.kmms.ac.uk/study/applying

² Including the practical endorsement in Science A Levels where appropriate.

How to apply

To apply to KMMS for 2027 entry you will need to submit your application to UCAS by the deadline of **15 October 2026**.

UCAS institution Code: **K31**

Course Code: **A100**

You will also need to have taken your UCAT (University Clinical Aptitude Test) within the year of your application.

What could life after graduating from KMMS hold for you?

KMMS will provide support and advice for students at multiple stages of their undergraduate education and look ahead to the next steps in their career. As a newly qualified doctor, you will be equipped with the curiosity, academic, professional and clinical skills to influence and improve future healthcare in Kent and Medway, and beyond.

We very much hope you will choose to work in Kent and Medway or the south-east of England. However, your medical degree will allow our Home Students to apply for a

Foundation Programme job anywhere in the UK. This postgraduate training programme will provide you with the required experience to gain full registration with the General Medical Council. 100% of our first cohort are now undertaking the Foundation Programme in the NHS*.

Once fully registered, you will have the education and experience to apply for any one of over 100 possible medical specialties.

Qualified doctors also work in the arts and media, business, the voluntary sector,

government, research and technology. There are national programmes available for medical graduates to obtain specialist postgraduate training and experience in leadership, management, entrepreneurialism and research.

For information about the application process, interviews and other details, please visit: www.kmms.ac.uk

*Please note that admission to the Foundation Programme by overseas students is dependent on government policy at the time students graduate.

“I love the sense of community at KMMS. Knowing everyone and having a good relationship with students and staff creates such a supportive environment.”

Daisy
KMMS student

“When I joined KMMS I realised how fortunate I was to be at a medical school which embraces the diversity of its students.”

Stephen
KMMS student
